### Efficient Receiving

Our inbound receiving system provides an efficient method for receiving inbound product. With tools to recommend pallet stacking, directed put away, and a fast closing process, you can be sure that your warehouse is always running smoothly.

### Cost-Saving Tools

Our WMS recommends shipping containers to minimize dimensional weight and save on shipping costs. With rate shopping at the ship container level and a rate comparison tool, you can ensure the lowest freight cost.

**WELCOME TO THE FUTURE OF**

**WAREHOUSE MANAGEMENT**

### **E-commerce and ERP Integration**

Twin Oaks WMS integrates with all major e-commerce platforms and seamlessly integrates with ERP systems, supporting order processing, fulfillment, inventory management, returns, product updates, and in-bound receiving.

### **Pick with Precision**

Twin Oaks WMS utilizes cost-effective Android devices and a mobile app that improves picking accuracy and inventory accuracy. With multiple pick methods including zone, cluster, combined bin, master carton, high demand, special destination, and pre-ticketed, you can choose the best option for your warehouse.

### **Inventory Accuracy at its Finest**

With our automated sync report and high-priority cycle count, you can be sure that your inventory is always up-to-date and accurate. And with min/max restocks and warehouse to warehouse moves, you'll always have a clear picture of your inventory levels.

### **Pack with Confidence**

Twin Oaks WMS packing application requires packers to scan all items during the packing process, ensuring order accuracy. With cartonization and the ability to print customized packing lists and gift messages, you can have confidence in the quality of your shipments.

### **State-of-the-Art Technology**

Twin Oaks WMS integrates with Amazon Alexa and Thankful AI, enabling you to ask questions and receive answers in real-time. With integration robotics systems, WCS, PLCs, and other material handling equipment, Twin Oaks WMS is at the forefront of technology.

### **Quality Control**

Twin Oaks WMS inbound and outbound quality control system allows for 100% QC or statistical sampling. You can specify QC targets at the employee, customer, and order level to ensure the highest quality products.

### **Return Processing Made Easy**

With integration with Narvar, B2C returns are fast and efficient. Twin Oaks WMS can receive return authorizations from your ERP system and quickly process unauthorized returns. The entire return process is streamlined, making it fast and easy for the consumer.

### **Real-time Warehouse Performance**

With real-time warehouse performance statistics, you can monitor productivity and quality across all employees by function. Twin Oaks WMS statistics engine facilitates employee performance reviews, bonus programs, and identifies areas for additional employee training.

### **Streamline Your Management**

Twin Oaks WMS management tools monitor workforce activity and provide automated recommendations for positioning and repositioning staff to proactively eliminate operational bottlenecks.
